

Project Title – “Donation Tracking System for NGO’s”

Phase 4: Process Automation (Admin)

Validation Rules: Donation Amount Positive:

1. **Purpose:** Ensures that the Donation Amount entered is always a positive number. This prevents incorrect data entry like negative or zero donation amounts.
2. **Formula:** `Donation_Amount__c <= 0`.
3. **Error Message:** *"Donation Amount must be greater than zero."*
4. **Impact:** Improves data accuracy, prevents invalid donations, and keeps donation reporting clean.
5. **Best Practices:**
 - Use clear rule names.
 - Keep formula simple and documented.
 - Display a meaningful error message.

WorkFlow rule: WR_Set_FollowUpRequired_OnDonation

The screenshot shows the Salesforce Setup interface for Workflow Rules. The left sidebar contains navigation links for Setup, Home, Object Manager, and a search bar. The main content area displays the details for the Workflow Rule 'WR_Set_FollowUpRequired_OnDonation'. The rule is active and evaluates the rule when a record is created and every time it's edited. The rule criteria are 'Donation: Status EQUALS Received'. The rule was created by 'Sindhu Jain' on 9/23/2025 at 6:09 AM and modified by 'Sindhu Jain' on 9/23/2025 at 6:38 AM. The rule has one immediate action: 'Email Alert' with the description 'Sends a thank-you email to donors whenever a new donation is recorded.' There are no time-dependent actions listed.

Workflow Rule Detail

Field	Value
Rule Name	WR_Set_FollowUpRequired_OnDonation
Object	Donation
Active	☒
Description	
Rule Criteria	Donation: Status EQUALS Received
Created By	Sindhu Jain
Modified By	Sindhu Jain
Created Date	9/23/2025, 6:09 AM
Modified Date	9/23/2025, 6:38 AM

Workflow Actions

Type	Description
Email Alert	Sends a thank-you email to donors whenever a new donation is recorded.

1. **Purpose:** Automates donor engagement by marking donations as requiring follow-up when a donation is received (e.g., send thank-you mail, reminder for next contribution).
2. **Rule Criteria:** Donation: Status = Received.
3. **Action:** Immediate email alert → Sends Thank You Email to donor.
4. **Impact:** Saves manual effort, ensures every donor receives acknowledgment, builds stronger donor relations, and supports future campaigns.
5. **Best Practices:** Use clear rule names, schedule reminders for future donations, and ensure donor engagement is automated for consistency.

Process Builder

1. Purpose: Automate donor follow-up/thank-you reminders by sending an email 7 days after a donation is received if no thank-you email has been sent yet.
2. Object: Donation (Custom Object) — triggered when a record is created or edited.
3. Criteria: Runs when:
 - Donor_Email_c is not blank,
 - Status_c = "New" (or "Received"),
 - Thank_You_Sent__c = False.
4. Actions: Immediate Action
 - Update field: Thank_You_Sent__c → True (once email sent).
 - Send Email Alert (Thank You Email).
5. Scheduled 7 days after Donation_Date__c: Send Follow-Up / Reminder Email to Donor or Fundraising Team if no acknowledgement received or next step pending.
6. Impact: Ensures timely donor engagement and higher donor retention.

Approval Process: Large Donation Approval

The screenshot displays the Salesforce Setup interface for an approval process named 'Donation: Large Donation Approval'. The left sidebar shows the navigation menu with 'Approval Processes' selected. The main content area is divided into three sections: 'Process Definition Detail', 'Initial Submission Actions', and 'Approval Steps'.

Process Definition Detail:

Process Name	Large_Donation_Approval	Active	☐
Unique Name	Large_Donation_Approval	Next Automated Approver Determined By	
Description			
Entry Criteria	Donation: Donation Amount GREATER OR EQUAL 50000		
Record Editability	Administrator ONLY	Allow Submitters to Recall Approval Requests	☐
Approval Assignment Email Template			
Initial Submitters	Donation Owner		
Created By	Sindhu Jain	Modified By	Sindhu Jain

Initial Submission Actions:

Action Type	Description
Record Lock	Lock the record from being edited

Approval Steps:

Action	Step Number	Name	Description	Criteria	Assigned Approver	Reject Behavior
Step 1	1	Step 1			User:Donor_Test	Final Rejection

1. Objective: To ensure that large donations are reviewed and approved by management before final processing.
2. Entry Criteria: Amount__c ≥ 50,000.
3. Initial Submitters: Donation Owner / Fundraising Staff.
4. Initial Submission Action:
 - a. Lock record to prevent edits during review.
 - b. (Optional) set Status to "Pending Approval" and notify approver.
5. Approval Steps:
 - a. Step 1: Manager approval is required.
 - b. If approved → moves to *Final Approval Actions*.
 - c. If rejected → moves to *Final Rejection Actions*.
6. Final Approval Actions:
 - a. Status updated to *Approved*.
 - b. Record remains locked (or unlocked if configured).
 - c. Notification can be sent to submitter.
7. Final Rejection Actions:
 - a. Status updated to *Rejected*.
 - b. Record unlocked for further editing if needed.

Flow builder

I have implemented Flow Builder to configure, Custom Notifications, and Task automation. The respective screenshots have been included for reference.

Email alerts

The screenshot displays the Salesforce Email Template Builder interface for a template named "DonationReceipt". The interface is divided into two main sections: "Details" and "Related".

Details Section:

- Information:**
 - Email Template Name: DonationReceipt
 - Description:
 - Made in Email Template Builder: ☐
 - Related Entity Type: Donor
 - Folder: Public Email Templates
- Message Content:**
 - Subject: Thank You for the Donation
 - HTML Value: Hi {{!Donation__c.Donor__r.Name}},
Thank you for your generous donation of {{!Donation__c.Donation_Amount_c}}
on {{!Donation__c.Donation_Date_c}}.
We appreciate your support!
Thanks,
NGO Team
 - Enhanced Letterhead

The interface includes a top navigation bar with tabs for Home, Opportunities, Leads, Tasks, Files, Accounts, Contacts, Campaigns, Dashboards, Reports, Chatter, and Groups. A search bar is located in the top right corner. The bottom of the screen shows a Windows taskbar with various application icons and a system tray displaying the date and time (23:07, 23-09-2025).

Tasks

Automate reminders for upcoming donation campaigns/donor follow-ups.

Example: Notify NGO staff 7 days before a donation campaign ends so they can follow up with donors or extend the campaign.

Pre-Setup

On **Donation__c**, make sure these fields exist (they match your earlier objects):

- **End_Date__c** (Date) – donation end/renewal date.
- **OwnerId** (standard owner field).
- **Donor__c (Lookup to Donor)** – links to donor record.
- **Reminder_Sent__c** (Checkbox, default = False) – prevents duplicate reminders.
- **Record_Link__c** (Formula field) – optional hyperlink to the record donation.

Flow Configuration Steps

1. **Create Scheduled Flow** ◦ Setup → Flows → New Flow → Scheduled-Triggered Flow.

- Frequency: **Daily** | Start Time: **2:00 AM**.
- 2. **Get Records** ○ Retrieve Donation__c records where:
 - End_Date__c = Today - 7
 - Status__c = Active
 - Reminder_Sent__c = False ○ Store all records in a collection.
- 3. **Decision Element** ○ Check if any records were retrieved. ○ If none → end flow.
 - If yes → proceed to loop.
- 4. **Loop Through Donations** ○ Iterate through each Donation record in the collection.
- 5. **Create Task** (inside loop)
 - **Subject:** Follow up donor for upcoming donation renewal
 - **OwnerId:** Donation Owner.
 - **WhatId:** Donation record Id.
 - **WhoId:** Donor__c.
 - **Due Date:** Today (7 days before expiry).
 - **Status:** Not Started.
 - **Priority:** High.
 - **Description:** Includes Subscription Name, End Date, and Record Link.

Outcome

This Flow automatically creates **Tasks 7 days before the donation renewal/End_Date__c** and marks Reminder_Sent__c = True to prevent duplicates. It helps your NGO staff stay on top of donations without manual follow-ups.

Custom notification

We'll create a **Custom Notification Type** and a **Scheduled Flow** to automatically notify **Donation Owners** 7 days before the donation's End Date. This will help NGO staff proactively follow up with donors and improve renewal efficiency.

◇ Step 1: Create a Custom Notification Type

1. Go to **Setup** → **Notification Builder** → **Notification Types** → **New**.
2. Fill details:
 - **Label:** Donation Renewal Notice
 - **API Name:** Donation_Renewal_Notice
 - **Supported Channels:** Desktop, Mobile, In-App (bell icon)
 - **Description:** Notification for upcoming donation renewals or end dates.

3. Click

Save.

- ◇ **Result:** Notification type is now available to use in Flows.
-

◇ Step 2: Build the Scheduled Flow

1. Flow Setup

- **Setup** → **Flows** → **New Flow** → **Scheduled-Triggered Flow**.
 - Object: **Donation__c**
 - Frequency: **Daily** | Start Time: **2:00 AM**
-

2. Get Donations to Notify

- Object: **Donation__c**
 - Criteria:
 - **End_Date__c** = Today + 7 (7 days before donation end/renewal)
 - **Reminder_Sent__c** = False
 - Store all matching records in a **collection variable**.
-

3. Decision Check

- If no records found → End Flow.
 - If records found → Proceed to Loop.
-

4. Loop Through Records

- Iterate through each **Donation__c** record in the collection.
-

5. Recipient Collection Setup

- Create a **Text Collection Variable** (RecipientIDs).
- Add the **Donation Owner (OwnerId)** to this collection.

6. Send Custom Notification (inside loop)

- **Notification Type:** Donation Renewal Notice
- **Title:** Donation expiring in 7 days: {!Donation__c.Name}
- **Body:** Ends on {!Donation__c.End_Date__c}. Open donation record for details.
- **Target Id:** Donation record Id
- **Recipient Ids:** RecipientIDs collection

7. Cleanup Recipients

- Remove the owner from **RecipientIDs** after each loop to avoid carry-over.

8. Update Donation

- Update field **Reminder_Sent__c** = True for each processed donation to prevent duplicate notifications.

9. Save & Activate Flow

- Save as **FL_Sched_CustomNotification_Donation_7d**
- Click **Activate**.

◇ Outcome

This automation sends a **Salesforce in-app and mobile notification** to the **Donation Owners** 7 days before the donation's end date. It also updates **Reminder_Sent__c** to **True** so no duplicate notifications are sent.
